Due to the varying configurations and versions, deviations between the displays or button assignments and this manual can occur.

The Game

After the desired stakes have been chosen the game is started with *START*. After the reel run the achieved winning combination is displayed among others by illuminated win lines and the win is added to the credit.

After the achieved wins have been added to the credit, bets can be placed anew.

The win plan respectively the onscreen help can be displayed at anytime by pressing the HELP button (or in this case win plan).

By a click on the symbols on the reels the player can get information regarding possible wins with a sufficiently great amount of the respective symbols.

Help - Menu

The help menu opens when pressing the HELP button. This has its own button panel.

Help Screen 1

The screenshot shows a help screen for a slot game. At the top, there is a status bar with a UK flag, a question mark, a speaker icon, a refresh icon, and a close icon. To the right of the status bar, the time is 03:41 and the ID is 114622788. The main area contains five grid-based diagrams illustrating winning patterns. The first diagram shows three horizontal lines with numbers 2, 1, and 3 on the left and right. The second shows a zigzag line with numbers 4 and 5 on the left and right. The third shows a zigzag line with numbers 6 and 7 on the left and right. The fourth shows a zigzag line with numbers 8 and 9 on the left and right. The fifth shows a zigzag line with numbers 10 on the left and right. Below these diagrams, the text "Wins pay only from left to right!" is displayed. At the bottom, there are navigation buttons: "2/2", "<<", ">>", and "RETURN TO GAME".

Help Screen 2

Gamble

The player has the option to activate the gamble mode before each game. With active gamble mode the player has the chance to multiply his/her win.

If the gamble mode is active, a screen opens when achieving a win, here the player has to guess whether the next card is black or red. At the beginning the total win is placed for bet, but the player has the option to bet only half the stake, resulting in having half of the win added onto the credit account. The bet is here called risk.

The player can also see the displayed card colors of the seven previous gambles.

When the player chooses black or red, he/she has the chance to double the win. The win can also be multiplied by choosing the suit, meaning hearts, diamonds, spades or clubs.

When the player has made a decision, the card is uncovered. If the guess is correct, the player wins. If it was wrong, the stake is lost. The player can multiply the win with further gambles as long as he/she chooses the correct color. The player can quit the gamble at any time by pressing the COLLECT button, the win will then be credited onto his account. If the player loses, the game continues.
